

MagLink[®]

SYNCHRONIZER

An indispensable tool in multi-track audio production; video mixing, editing and "sweetening"; film sound track production, and foreign language overdubbing.

MagLink is a completely new approach to fast, efficient tape synchronizing, position logging and editing. Through the use of a unique timing code system, videotape, multi-track audio, and magnetic film machines may now be locked in synchronism, offset, or stopped and

started at preset positions with an accuracy not formerly attainable. A master and any number and any type of slave machines may be controlled by MagLink and will remain synchronized even in REWIND and FAST FORWARD modes.
