System Supervisor Unit Software Release Notes

DATE: 4/17/18

MODEL: System Supervisor Unit (SSU)

REVISION: All

SERIAL NO: All

SOFTWARE:

PROM Name	Version
MAIN	1.42
TGEN	*1.43*
TRIB	1.42

MANUAL: 73A006

DESCRIPTION:

TGEN 1.43

The following improvements have been made in the TGEN 1.43 software release:

• Master/reference time code generator (TCG) is now operational in Rewind, when the time code type is Drop Frame.

Software History

SSU 1.42 Series

The following improvements have been made in the SSU 1.42 software release:

• SSU Trip Port 3 now supports the Harrison MPC1 Console Automation System. The Supervisor generates serial information that contains master transport status and reference time code for the console.

• Internal support for the TimeLine Remote Motion Control Unit (RMC) when connected to the SSU Logic I/O Port has been improved.

• GPI duration calculation and battery backup for GPI registers now work correctly.

• Neve Flying Faders Automation software versions (1.2/2.X/3.X) are now automatically detected so that differences in Auto-record operation are handled correctly.

DESCRIPTION (continued):

<u>SSU 1.42 Series (continued)</u>

- SSL Stripe Mode is now fully functional with the latest SSL G Series and Ultimation Automation software.

- The Supervisor correctly handles record entry from stop.
